ZETA

# ZyCraft™

Zeta is a 54' motor yacht design concept and the result of a collaboration between Zycraft and Seventy Seven Design. Using military technology pioneered by Zycraft for the unmanned surveillance vessel Pirahna, Zeta is a powerboat without equal.

Using nanotube carbon fiber technology has enabled a very strong yet lightweight construction; increasing agility, performance and range. The wave piercing hull ensures smooth performance in the most challenging conditions and the inclusion of a Seakeeper gyro stabilizer is a first in this class of motor yacht.

The stealth like exterior styling is an evolution of Zeta's military origins and gives the yacht an aggressive purposeful stance, even when stationary. The interior comprises of a lounge area and cockpit with 4 shock absorbing Ullman helm seats ensuring that even in roughest seas the ride is smooth.

#### ZETA Specifications:

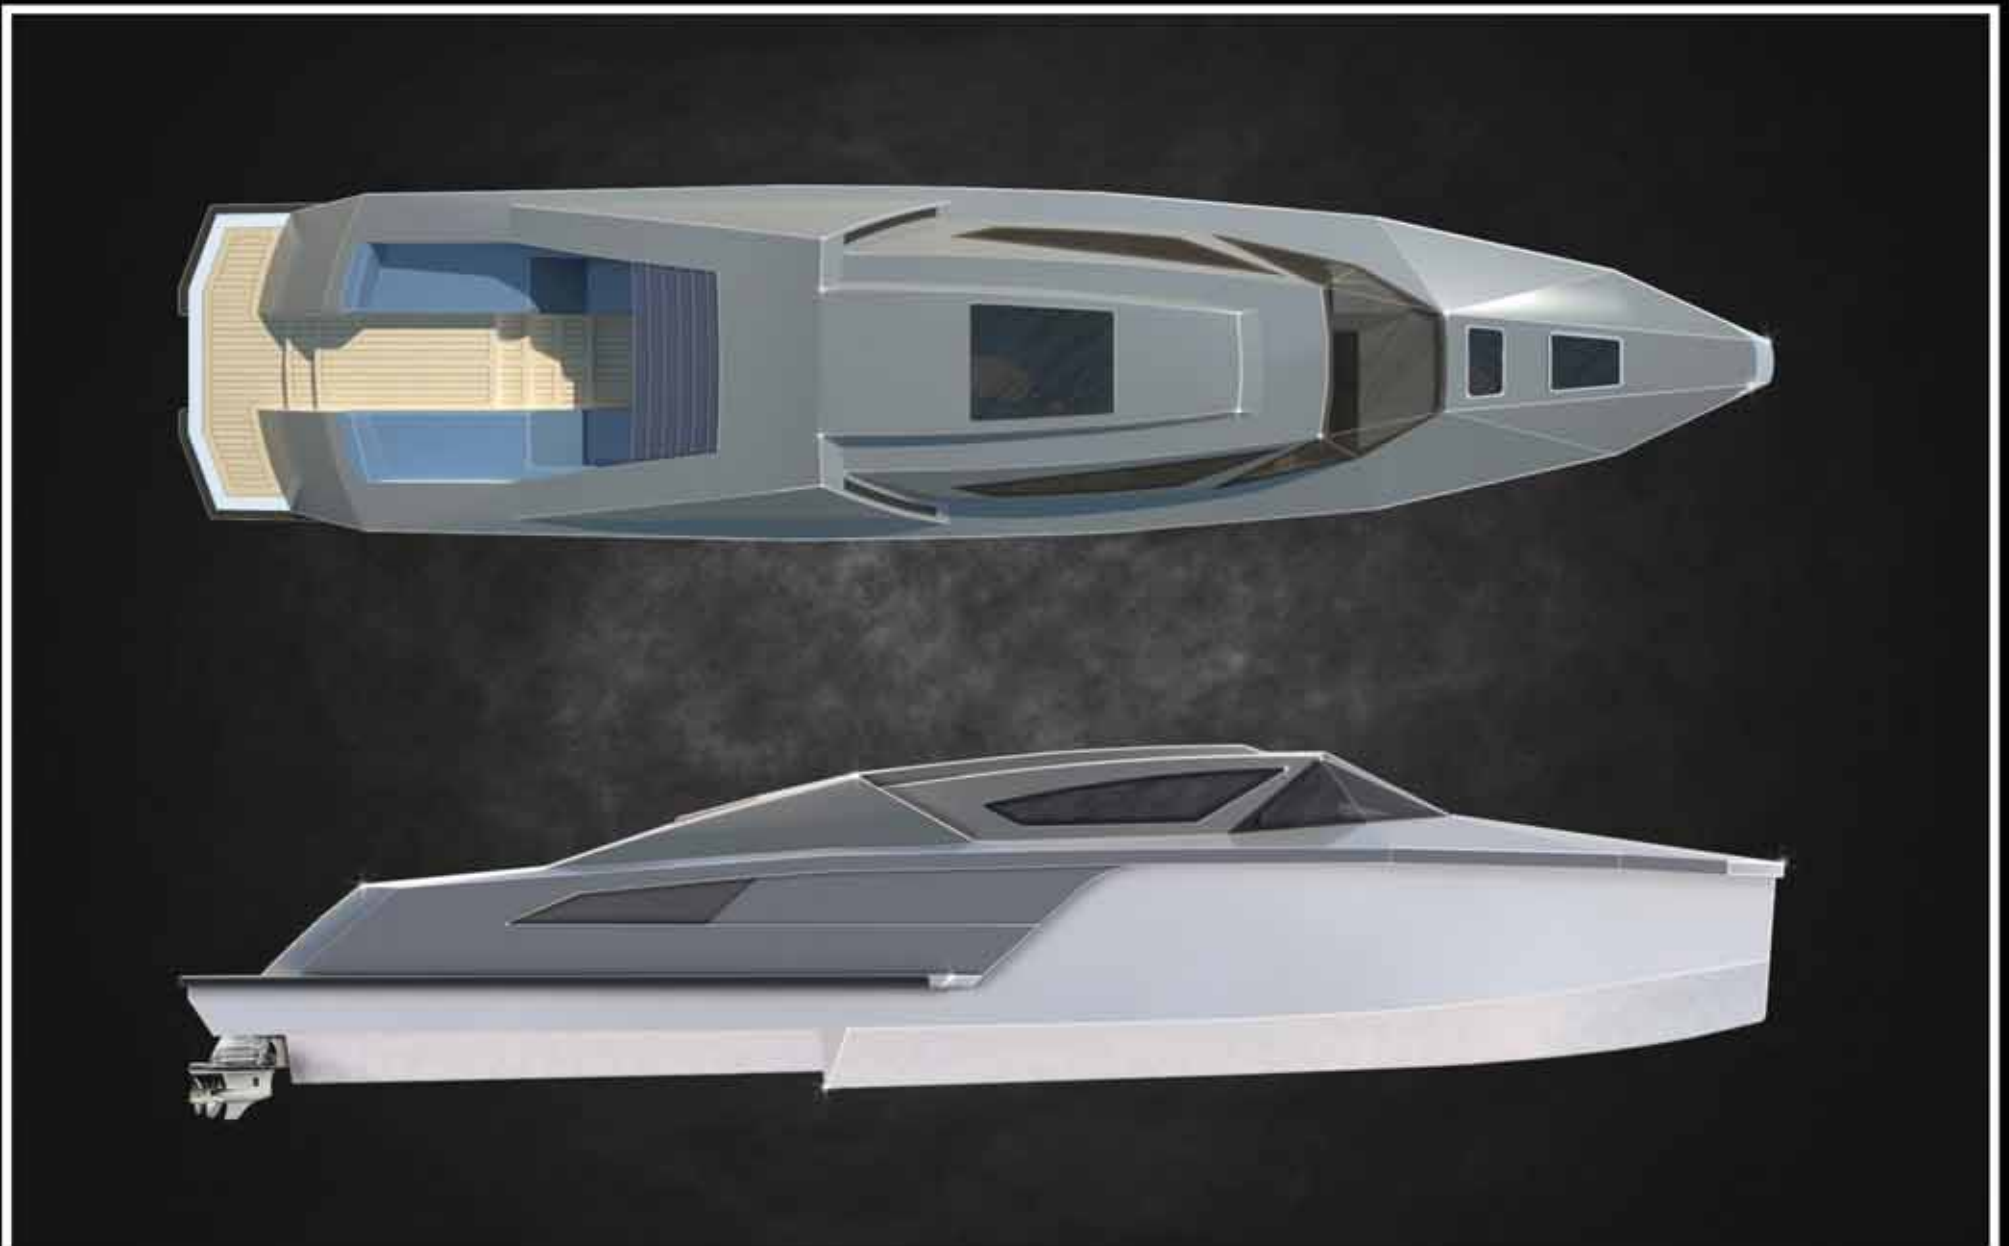

Length: 16.5m

Beam: 3.6m

Maximum Speed: 35 knots

Displacement: 8,000 kg

Max Range: 2,000nm
